Preface

This dictionary was written by a learner and a native speaker of Luganda. It was meant to provide a basic vocabulary for learners of Luganda with an indication of the class of a noun and the modified stem of a verb. It is however not a scientific result of research. By asking native speakers of Luganda we tried to include various modern-day meanings of a word and even slang. We thus apologize for possible spelling errors or insufficient translations. Nevertheless, we are confident it can be used as a helpful source for learners of Luganda to understand the general meaning of a word.

Use of the Dictionary

1. Nouns

The nouns are given in their original form including the initial vowel that is sometimes dropped in Luganda. The classes are defined by number:

Class	Class Prefix	example	translation
I Sg	(o)mu	omuntu	person
I Pl	(a)ba	abantu	people

2. Verbs

In order to achieve alphabetic order the oku- prefix for the verb has been dropped and only the stem of a verb is given in the first column. In the second column the modified stem for the past tense and sometimes the irregular first person singular can be found.
